Introduction

BarOn Emotional Quotient Inventory: Youth Version (BarOn EQ-i:YV™) assesses the emotional and social functioning of youths aged 7 to 18, providing an estimate of their underlying emotional and social intelligence. This report renders information about the respondent's emotional and social functioning in terms of obtained scores. The total score and scale scores are presented as standard scores. A standard score in the range of 90 to 110 indicates effective emotional and social functioning. A score greater than 110 suggests the presence of enhanced emotional and social skills, while a score of less than 90 suggests that emphasis should be placed on enriching skills in that area.

The information provided in this report should be used as an interpretive guide for the purpose of generating hypotheses about the respondent's current emotional and social functioning. These results should be used in combination with collateral information such as reports from other assessment instruments, academic records, behavioral observations, and information provided directly by the respondent. Please refer to the *BarOn EQ-i:YV™ Technical Manual* for a detailed description of the instrument, including its development, validation, and the construct it measures.

Total EQ and Scale Scores

This graph displays Brenda's standard scores for the Total EQ and each of the five scales.

Summary of Scale Scores

This table presents raw scores, standard scores, and interpretive guidelines for all obtained scores. Please refer to the *BarOn EQ-i:YV™ Technical Manual* for more information on the interpretation of these results.

Scale	Raw Score	Standard Score	Guideline
Inconsistency Index	0	-	OK
Positive Impression	15	103	Responses do not indicate an exaggerated positive impression
Total EQ	62	111	High - a well-developed capacity for emotional and social functioning in general, including coping with daily demands and pressures
Intrapersonal	18	113	High - a well-developed capacity for understanding and expressing feelings
Interpersonal	41	105	Average - an adequate capacity for understanding others and relating with people
Stress Management	36	106	Average - an adequate capacity for managing and controlling emotions
Adaptability	30	105	Average - an adequate capacity for managing change and solving problems
General Mood	48	105	Average - an adequate capacity for being positive and optimistic

Item Responses by Scale

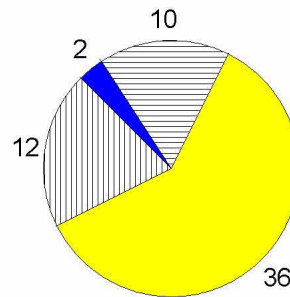

This table lists Brenda's individual responses to the BarOn EQ-i:YV™ items. The items are grouped according to the scale to which they belong. The distribution of responses is illustrated in the pie graph below.

Positive Impression	Intrapersonal	Interpersonal	Stress Management	Adaptability	General Mood
Item Response	Item Response	Item Response	Item Response	Item Response	Item Response
8. 2	7. 3	2. 3	3. 3	12. 3	1. 4
18. 2	17. 3	5. 4	6. 2	16. 3	4. 4
27. 2	28. 2	10. 3	11. 3	22. 3	9. 4
33. 3	31. 3	14. 4	15. 3	25. 3	13. 3
42. 3	43. 3	20. 4	21. 1	30. 3	19. 3
52. 3	53. 2	24. 3	26. 2	34. 3	23. 4
		36. 3	35. 2	38. 3	29. 3
		41. 4	39. 3	44. 3	32. 3
		45. 3	46. 2	48. 3	37. 3
		51. 4	49. 3	57. 3	40. 4
		55. 3	54. 2		47. 4
		59. 3	58. 1		50. 4
					56. 3
					60. 3

Response Key

- 1 = Very Seldom True of Me
- 2 = Seldom True of Me
- 3 = Often True of Me
- 4 = Very Often True of Me
- ? = Omitted Item
